Provillus™ Hair Growth Treatment for Men

- ❖ Inhibits formation of DHT naturally and safely
- ❖ Provides nutrients to promote re-growth

Do you dread taking showers, knowing you'll see more hair go down the drain?

Hair loss IS a big deal—it affects many aspects of your life—but you can by taking a PROACTIVE approach with Provillus™.

If you're looking for a safe, natural solution to re-growing (and keeping) hair, then read on...

The Main Culprit in Male Hair Loss--DHT

Dihydrotestosterone (DHT) is a hormonal byproduct of testosterone that has been shown to shorten the growth phase of hair by retarding follicle growth. While DHT is essential for early development, it can attach to hair follicles

as men get older, which causes the follicle to get smaller and smaller, and the hairs to get thinner—eventually falling out. The result is fewer visible hairs, and if left untreated, can result in male pattern hair loss (Androgenetic Alopecia). Inhibiting DHT formation can help prevent early thinning and hair loss.

Provillus™ Hair Growth Treatment is a Unique, Two-Fold Approach:

Naturally Inhibits DHT

Provillus™ uses a proprietary blend of botanicals that naturally inhibit DHT formation, while also providing nutritional support for prostate health. Saw Palmetto and Nettle are two key ingredients, both of which block DHT and have been used in traditionally for many years. See our ingredients page for complete list.

Promotes Hair Growth with Targeted Nutrients

Strong, healthy hair begins with the proper nutritional building blocks, and Provillus™ provides essential minerals and vitamins helpful for hair follicle support, such as Zinc, Magnesium, Biotin and Vitamin B6...which are also essential for immune function, skin and nail health, protein digestion and healthy red blood cells.

Read more on our [ingredients](#) and [FAQ](#) pages.

You want to keep a healthy, full head of hair for as long as possible. Provillus™ Hair Loss Treatment not only helps you keep the hair you have, it also provides the nutritional support you need to maintain optimum hair growth and normal follicle function—so you feel good as well as look good—that's the Provillus™ Difference!
